- Completed a **4-month internship** on **Artificial Intelligence using Python**, affiliated with the Council for Technology & Science, Kerala.
- Developed Python programs implementing AI concepts such as data processing and algorithm-based solutions.
- Applied **Python programming** and problem-solving skills in practical AI-focused projects.
- Collaborated with team members to test and refine code for accuracy and performance.

Education

Aspire College of Advanced Studies, Thrithala — Affiliated to Calicut University 2022 - 2025

Bachelor of Computer Applications (BCA)

GHSS Ganeshgiri 2021

Higher Secondary Education in Computer Science **Percentage: 60.0%**

Project Work

- Votesphere – Campus E-Voting Platform (Freelance, 2025)**

Built a full-stack Django web application with Python, HTML, CSS, JavaScript, and Bootstrap to digitize campus elections. Added role-based authentication for multiple user types, Excel voter upload/validation using pandas & openpyxl, and automated result calculation.

Test Credentials: Admin: admin / Pass@1234 | Officer: officer / Pass@1234 | Presiding Officer: presidingofficer / Pass@1234

- ChargeSpot – EV Charging & Service Booking System (Academic Project, 2025)**

Developed a full-stack web application using Django, Python, HTML, CSS, JavaScript, and Bootstrap to manage EV charging and service bookings. Users can book/cancel slots, check availability, submit feedback, and view stations on a map, while station providers can create/manage slots, track bookings, and view orders & feedback. Integrated Razorpay for secure payments.

Test Credentials: EV Owner: zaheermv / test1234, Station Provider : tata_power / license:10 / test1234
